

POSMAT | Programa de Pós-graduação em Engenharia de Materiais

Course: Physical Metallurgy Fundamentals and Thermal Processing of Metals

Code: MEM.008

Credits: 03

Module: Specific formation

Research area: Selection, processing e characterization

Contents:

Principles of metallurgical thermodynamics and phase diagram. Diffusion in solids. Nucleation and growth. Precipitation in metallic materials. Ferro-carbon system and phase transformations. Recovery and recrystallization in metallic materials.
