

Course: Recycling of Urban and Hospital Solid Waste

Code: MEM.012

Credits: 03

Module: Specific formation

Research area: Recycling

Contents:

Industrial solid waste and main industrial sectors generating; Usual practices of handling, destination and recycling of materials; Demand for inputs in the production chain for the ceramic materials, metal alloys, polymeric materials and other industries (second generation raw material); Main characteristics of waste for employment viability as raw materials in the construction, transportation, agricultural inputs and other sectors; Applications of materials science concepts in the recycling area.
