

Course: Structure, Properties and Processing of Polymers **Code:** MEM.016

Credits: 03

Module: Specific formation

Research area: Selection, processing e characterization

Contents:

Structural aspects of polymers: Influence of synthesis, processing, additives and exposure environment. Relationship between the properties and structure of polymers. Advanced techniques for structural characterization of polymers: Molar mass; spectroscopy; microscopy; mechanical characterization; thermal analysis; strategies to define the most appropriate techniques.
